

Glue

 10 minutes

INGREDIENTS

corn flour

water

boiling water

DIRECTIONS

Glue can be used for many arts and crafts and if used regularly it can get quite expensive to buy. Making your own in small or large batches is very easy and cheap, with only 2 ingredients.

1. Mix 1 tablespoon of each corn flour and water until well combined.
2. Slowly add 1 cup boiling water whilst stirring constantly to create a thin paste.
3. It is ready to use when it has cooled.
